

Dental Costs 2018

We believe in being upfront about our prices, so please find below a general list of our current treatment costs which you can use as a guide.

Please note that not all of the treatments we provide are listed below.

We advise you make an appointment with your dentist to get a more accurate idea of pricing.

The dentist will prescribe a treatment plan for you on your check-up visit if you require any dental treatment, or if you visit the surgery presenting pain. The receptionist can give you a print-out of your treatment plan which clearly sets out the cost.
